Fine Jewellery

That which glitters and catches the eye from across the room. Exquisitely made, great attention to detail. These are pieces that will last for many years and even gain in value. Heirlooms. Made from gold and platinum set with precious natural or synthetic gems.

These are examples of pieces Jared makes for sale, available in stock or can be made to order. You can request any type of stones

18crt Opal and diamonds2.

The shank on this ring is from an older piece. Originally it held a platinum prong setting for three diamonds. These were removed and used on another piece, the prong settings were cut off and I fabricated the oval bezel setting for the deep blue opal and retained the original small diamonds in their original settings

Bezel set Emerald trillion.

This is a laboratory created emerald, set in a 9crt ring

18crt Opal and diamonds.

A stunning vivid blue Opal, set with two diamonds on an 18crt gold ring

Black diamond ring.

A heavy silver ring set with Carbonado, commonly known as Black Diamond. It is a natural polycrystalline diamond found in alluvial deposits in the Central African Republic and Brazil. Its natural colour is black or dark grey, and it is more porous than other diamonds.

Emerald trillion gold ring.

This is a laboratory created emerald, set in a 9crt ring

Gold Emerald claw set

This is a laboratory created emerald, set in ten claw setting in a 9crt ring

Gold teardrop sapphire ring

This is a laboratory created Sapphire, bezel set in a 9crt ring

Large Sapphire gold ring

This is a very large laboratory created Sapphire, claw set in a 9crt ring. I like using synthetic gems like this as it enables me to create larger pieces with greater impact for an affordable price

Black diamond gold ring

A heavy 9crt gold ring set with Carbonado, commonly known as Black Diamond

Silver and cubic zirconia ring

A heavy silver ring, flush set with a cubic zirconia. The inside of the ring is polished for comfort, the outside has a matt finish. This design is can be made in gold with any faceted gemstone

Silver and cubic zirconia rings

Heavy silver rings, one flush set with a cubic zirconia, the other has a recessed bezel setting. The inside of the rings is polished for comfort, the outside has a matt finish. These designs can be made in gold with any faceted gemstone

Silver ring with cubic zirconias and Amethyst

A heavy silver ring, flush set with cubic zirconias and a Marquise cut Amethyst. The inside of the ring is polished for comfort, the outside has a matt finish. This design is can be made in gold with any faceted gemstone

Gold teardrop Emerald ring

This is a laboratory created Emerald, bezel set in a 9crt ring
